

Mr S – Dunstable

Business Premises

Having flooded 4 times and dealing with the terrible stench, swollen shop fittings and damaged stock, I decided I had to take some action. We had the Flood Ark System fitted in September 2007.

Within two months I arrived at work to find the neighbouring premises, a hairdressers and a Tourist Information office had flooded during the night, whilst my shop was as dry as a bone. What a great feeling that was, I had taken control and reaped the benefit.

Needless to say, Flood Ark have been back to install their flood barriers to the neighbouring properties.
